those prohibited from registering by General Sheridan to become voters.

The first move in the Davis trial will be to quash the indictment, on the grounds of certain informalities in it. Should the motion provail, the prosecution will have to find a new indictment before April. 1805; for according to the act of 4700, under which Mr. Davis is arraigned. "No person or persons shall be prosecuted, tried, or punished for treason or other capital offense aforesaid, willful murder or perjury excepted, unless the indictment for the same shall be found by a grand jury within three years next after the treason or capital offense aforesaid shall be done or committed." As the war ended in April, 1805, the time for holding Jefferson Davis under charge of treason has nearly expired. It is the belief of certain well-posted men here, that the delays in bringing on the trial are purposely interposed to involve this as a successful plet.

Healing the Sick Without Medicine

DR. A. J. HIGGINS. OF CHICAGO, ODYLLIC PHYSICIAN,

For Chronic Diseases,

WILL BE AT THE PHILLIPS HOUSE, Dayton, Ohio, May 1st, and remain three Weaks.

The Higgins gives no medicine, but cures by a new and scientific method, which is flar superior to any other yet discovered. So powerful and so natural is this system, that by it many have been restored to health in an incredibily short space of time, who have for many years surfered from discease which have been pronounced incurvable, and to whom medicine has been administered with no good effect. Many who have for years suffered us fold miseries is the back and head, have been entirely cured in one week. In: Higgins' practice is very effective in all spinal diseases; also cures Cancers of all kinds in from ten to fifteen days, and that too without leaving the patient poisoned, but his blood will be cleabed so that it will never again return. By this practice nature is assisted in restoring the equilibrium of the vital forces, and when the patient is cured he will also have learned how to keep well.

The Dr. here announces that his practice is seementially different from other persons professing to heal the sick without medicine, that to Judge him by them would be deing him great industice.

There is neithing mirraculous or supernatural

usice.
There is nething miraculous or supernatural bout this prartice. By some it is called a gift, but it is based upon strict principles of natural clence, and is commended by many eminent physicians of other practices who have received treatment for thousand or the practices who have received treatment for thousand was and families, and also rec-

WALTHAM WATCHES I .- We claim, and are prepared to prove, the

the American Watches, manufactured at Waltham, Mass., are not only equal, but far superior to the common watches of England, Switzerland, and

II .- While we admit that it would be difficult to excel the masterpleces of the eminent European nanufacturers, and while we do not claim to have made any decisive improvements over them, we do assert and challenge a successful denial, that our superior class of watches are fully equal, in enery respect, to the most expensive specimens of foreign obronometrical art.

III -- We claim that our Watches are cheaper, more accurate, less complex, more durable, better adapted for American use, and more easily kept in order and repaired than any other watches

IV .- The reasons why our Watches possess these dvantages over their European rivals are chiefly First. Because the principle of the division of labor is carried out in our workshops to its extremest limits, not in human industry only, but in uachinery as well. Every watch passes through hundreds of hands and hundreds of machines.

Second. Because we promptly adopt every new invention to perfect our machinery, and every proffered improvement in the structure of watches Third. Because in each of the very numerous ninute, and often microscopic parts of which watch is made up, we attain, by mechanical power, nearly obsolute mathematical precision and uniformity, which it is utterly impossible to achieve ny manual labor. Wheels, pintons, escapements balances, springs, and screws—exact counterparts in weight, eircumference, and dimensions-are turned out by millions by the unerring, because un swerving, fron hands of machinery. Hence, every watch of any one style is a true copy of its model

V .- these results enable us to defy foreign ri valry, because nosimilar uniformity and precision is attainable by hand, and because in Wal ham alone is machinery exclusively employed in the manufacture of this intricate and delicate mech-VI -- Now, as will be seen at once, this similarity

n structure reduces the cost of production; it we cures uniformity in results; it perpetuates and safullibly diffuses any excellence that may be one achieved; and makes it easy to repair any injury oustsined, or replace any part that may be lost o destroyed. VII-In addition to these mechanical advantages

orWatches are simpler in structure, and therefore tronger, and less likely to be injured than the ma ority of foreign watches. They are composed of from 105 to 300 pieces. In an old English watch here are more than 700 parts. VIII.-We began our experiment in 1853, in the see of a formidable prejudice against American watches. Our system was new and untried. We have steadily increased our facilities, until now

we employ over 700 artisans, and sell 70,000 watches a year. Nearly a quarter of a million of our watches are in use to-day in every State of the Union, as well as in the Mexican and British Provinces and Colonies. Their universal popularity is the best proof of their merit that we can produce. They bave won their way in spite of every oppositio and or immemorial prejudices. Hundreds of deal ers all over the country have expressed their pref rence for our products after a long and practica experience with foreign watches.
